Ladies and Gentlemen,

Poland over the years was closed to the influence of the processes determining the development of the global maritime economy, and only the accession to the European Union broke this isolation.

In many cases it doesn't mean to automatically take over the existing solutions, as they should rather provide inspiration in finding concepts most appropriate for the Polish conditions. One of such themes is the model of the Polish seaports management.

Appreciating the importance of this problem and the effects resulting from the failure to introduce innovative solutions, we together with the Association of the Sea Cities and Municipalities organise an international conference "**Seaports management models in Poland and Europe**" in Gdańsk, on **13-14 September 2010**.

Being deeply convinced, that your knowledge, experience and competences could provide significant material contribution to the value of the debate organised within the framework of the conference, we are pleased to invite you to participate in the seminar.
