

The Mielno commune is looking for new partnerships – a communes, a twin towns. We are interested in student exchange programs, a cooperation between associations, seniors, community centres, schools, preschools and common acquisition of EU funds. Nowadays our commune has five partners: two polish (Gródek nad Dunajcem and Łądek), two german (Altenpleen commune, Schorfheide) and one Sweden (Båstad commune).

The Mielno commune is situated on the coast of the Baltic Sea covering 25 km of the coastline. Mielno and its neighbourhood belong to the most attractive regions on the Polish Coast, both because of its tourism and natural environment values. Besides the natural and recreational values the region is characterized by the sea climate-the air filled with iodine and salt. A lot of different water, pedestrian and bike routes cut through the region. The air filled with iodine and salt, large forest areas, attractive tourist routes and the specific microclimate are the unquestionable attributes of the Mielno commune. In summer a lot of different artistic, sport and recreation events take place here. Mielno is the capital of the commune; it is 12 km from Koszalin. The main attraction of Mielno is the clean and lifeguarded beach surrounded by numerous cafes, restaurants, fish and chips shops and other fast food bars. One can take a walk along the picturesque walking promenade. There are a lot of tourist attractions in Mielno: for the brave and adventurous- bungee jumping, for children- funfair and street zoos, for everybody- horse riding.

Mayor
