

Dear Madam/Sir,

I am Karin Salu and looking for post-bachelor degree practice.

My BA is for geo-ecology. My main research area is city's green infrastructures, i.e. city parks, roof gardens, etc, their structure and, mainly, how they impact to social and ecological environment.

I am also trained for environmental impact and sustainability assessments.

My side-subject was IT, so I have studied 3-D drawing and planning for landscapes.

I am looking for practice to put my ideas and skill to work and also get necessary knowledge about real situations. The term for practice can be up to 6 months.

I have studied in Tallinn University and Czech University of Life Sciences.

Please find my cv in LinkedIn <https://www.linkedin.com/in/karin-salu-23a980ba>.

If there is any other information needed to better consider my candidature to practice at your organization, I will you send it immediately.

My contacts: +372 52 64 976, salukarin@gmail.com

Sincerely,

Karin Salu
