Welcome to Technology Transfer Center!

We are proud to offer you an opportunity to expose, find and develop products, services and R & D.

In the economy of today and tomorrow the technology transfer is important to everyone who wants to stay ahead. We call them pioneers.

The Baltic Sea Region is one of the most innovative regions in the world. There is a specific interest from China in the Baltic Sea Region. The Chinese economy, as the salaries go up, is changing in terms of low-value products are replaced by products higher up in the value-chain.

We believe that both the Baltic Sea Region and China will rise from this situation and meet by giving a lot of new inputs to the world economy.

The rise of the economics of China and India has enhanced the interest to find new ways of communication.

Through the Technology Transfer System, we offer you a new way to communicate. Again, welcome!

Technology Transfer Center, Bredbandet 1, Varvsholmen, SE - 392 30 Kalmar, SWEDEN | info@ttcenter.eu

Technology Transfer Center

- Technology Transfer Center collects and exposes products, patents and research with a technical level as well as investment opportunities and business inquiries from all over the Baltic Sea Region and China in a unique, modern and digital marketplace.

Technology Transfer Center

- Contains structured and validated information about high-tech products

- CPV-codes and WIPO-codes are standard classifications

- Profile settings

Technology Transfer Center Clusters

- Structure by clusters

- Promotion cluster, Industrial segment cluster (ex. LED cluster or Cleantech clusters)

- Geographical clusters

- The UBC cluster

- Multidimensional storefront

- One company can be a member of many different clusters and show their products without extra charge. A company only pay once a year to the "home cluster"

- A presentation page brings together member companies' products and is at the same time your own customized entrance to the TTC

BALTIC SEA REGION & UNION OF BALTIC CITIES NETWORK

THE INNOVATIVE REGION

The Baltic Sea Region is one of the most competitive regions in the world. The export value per capita is one of the highest in the world with Sweden, Norway, Denmark,Finland and Nothern Germany in the lead. New democracies like Poland, latvia, Lituania and Estonia are catching up and have a big growth potential.

Advanced technology, innovation and streamlined production processes, in combination with a high level of education, is our strength. Innovators and entrepreneurs are constantly adding new technologies and products for the world market. The Trade and Technology Transfer system covers 10 countries and over 100 cities combined. To support and encourage a sustainable economic development and local job creation is our purpose.
