Lake Tamula Promenade and Roosisaare bridge

800 meters long Lake Tamula Promenade in Võru starts from the Tamula Hotel and runs along the beach until the Roosisaare suspension bridge (Rose island) .

The bridge is 100 meters long and boasts a wonderful view of the City of Võru and Lake Tamula.

Different attractions enhance the appearance of the promenade: children's playgrounds with swings, climbing nets and sliders; green grass for those who don't want to lie on the sand, stands with seats and pontoon bridges that take you on the lake. If you get tired from walking, you can rest on the comfy bench-swings, where you can look at the bustling ducks and swans. You can also play volleyball, listen to concerts and get a bite to eat.

The promenade was awarded the title "Estonian Landscape Architecture Event of the Year 2009".
