

## Organs

Windy Liepāja is a proud home not only of the widest sandy beach and longest beach park in the country, the largest historical military fortress and oldest electric tramline in the Baltics, but also of the largest mechanical pipe organ in the world located in the Holy Trinity Lutheran Cathedral with its 131 stops, 4 manuals and more than 7000 pipes. The organ was constructed by one of the best master organ builders H.A.Contius. The Cathedral offers concerts of organ music and its Annual International Organ Music Festival in September has already become a widely popular event.
